

Web Application Engineering

Lab # 04

Objectives

Get basic understanding to the implementational aspects of

- Bootstrap4 (Headings, Buttons, Cards and Bootstrap grid system)

Lab Activities

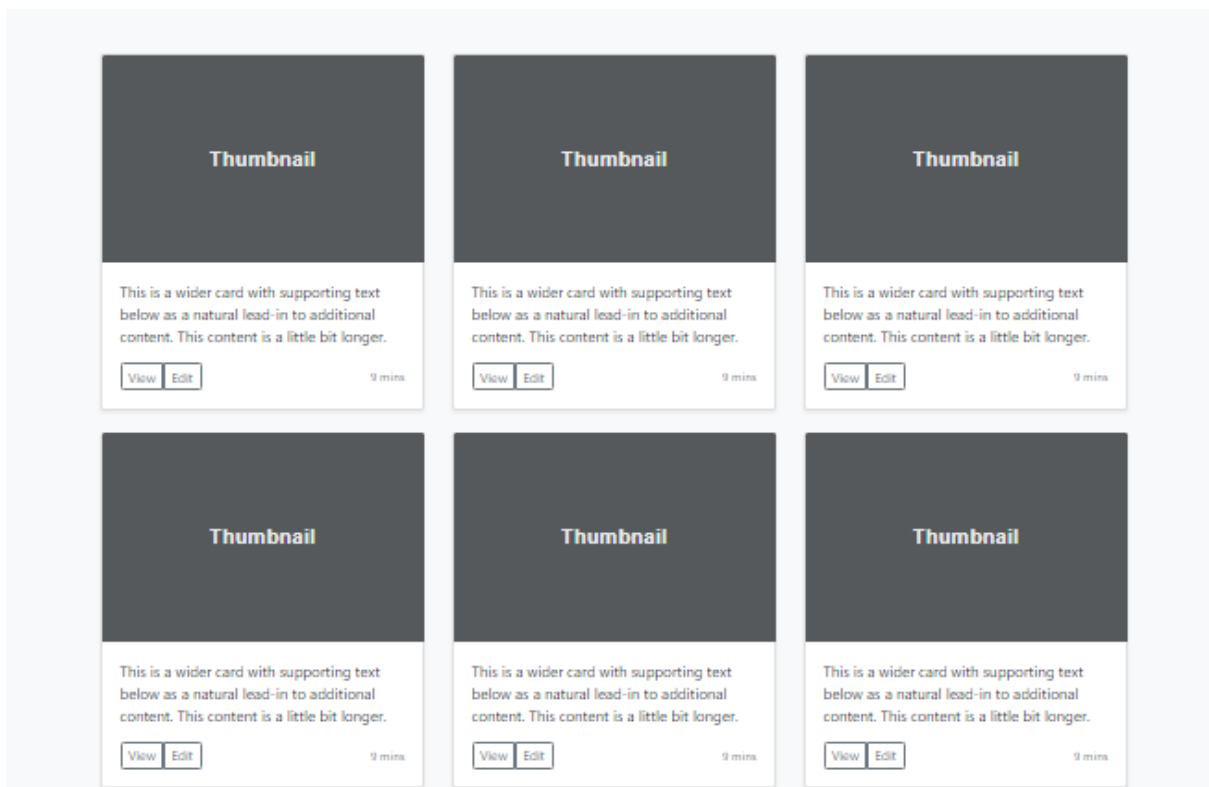

1. Using the concepts of bootstrap make the web design as given below for large or extra-large screens.
 - a. You may use the Heading, paragraph, button and mx-auto classes for the upper part of web.
 - b. Use card classes to generate content part along with grid system.
 - c. For large or extra-large screen your card should span 4 columns

Album example

Something short and leading about the collection below—its contents, the creator, etc. Make it short and sweet, but not too short so folks don't simply skip over it entirely.

Main call to action

Secondary action

2. For small or extra-small classes, the layout should be changed to the below given image. For small or extra small screens, the card should span 12 columns

Album example

Something short and leading about the collection below—its contents, the creator, etc. Make it short and sweet, but not too short so folks don't simply skip over it entirely.

Main call to action

Secondary action

Thumbnail

This is a wider card with supporting text below as a natural lead-in to additional content. This content is a little bit longer.
